About the ETC Authors

C. Wilson Anderson, Jr., T. Elli Cross, and Joan M. Stoner, authors of the materials listed on pages 13, 14, 15, & 25, are professionals interested in students and adults who have not learned to read, write, and spell in spite of adequate intellectual ability and ample opportunity to learn. All are experienced classroom teachers, tutors, and consultants and have over seventy-five years of combined teaching experience working with dyslexic/learning disabled students from kindergarten through adult literacy programs. All are Orton-Gillingham trained as well.

Specific Language Training: An Orton-Gillingham Curriculum for Adolescents

Author: Margaret H. Kleiber

Includes...

Alphabetic Code (sound/symbol)

Syllabic Code (syllabication)

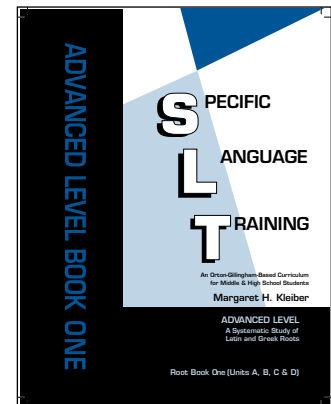

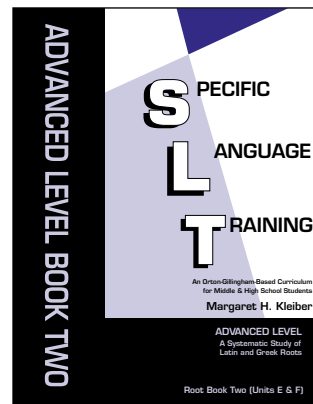

Latin & Greek Roots & Affixes

All three levels...

- provide a careful structure and sequence
- utilize multisensory techniques
- have a format and pace appropriate for the older learner
- have been used for group instruction and individual tutoring
- encourage independence in reading, writing, and spelling
- allow students to master written English with confidence

Each SLT lesson provides...

- an OVERVIEW for teachers with guidelines
- an ORDER FOR INSTRUCTION with suggested sub-steps to follow
- WORD LISTS, carefully controlled to include only sounds, symbols, and patterns (or roots) previously mastered.
- PRACTICE SHEETS (or tests) for students (reproducible)

Intermediate SLT: The Syllabic Code

- enables the older learner to build decoding fluency and recognition of spelling choices through a carefully sequenced study of the 6 syllable types and other regularities
- presents multisyllabic words in a carefully constructed sequence and develops skill in syllable division
- has 70 levels for development of mastery
- presents the three major rules for adding suffixes
- gives special attention to variations in code patterns, such as hard and soft c
- spiral bound: 284 pages

Gallistel-Ellis Test of Coding Skills (GE Test) - Preschool to Adult

The Gallistel-Ellis Test of Coding Skills (GE Test) is a comprehensive measure of coding skills in reading and spelling. The test measures whether a student can give the sounds for the various letters and units or clusters. More importantly, it measures whether the student can recognize and spell words made up of these sounds.

The Teacher's Manual...

- provides detailed instructions for administering and interpreting the test
- includes directives on scoring and when to stop testing
- offers advice on test modifications.

The test covers all categories of phonic structures:

- closed syllables with single consonants, blends and digraphs
- silent-e words; soft c and g
- vowel teams and vowel-r
- suffixes and modifiers such as s, ed, ing, y, tion and consonant-le
- multi-syllable and irregular words
- nonsense syllables (to enable the tester to determine if the student relies on sight memory or has truly "cracked the code")

The test is easy to administer to individual students and requires approximately 20 minutes for the teacher or assessment specialist to acquire the critical knowledge of what skills have been mastered, what need to be reviewed, and what to teach now. Post-testing can document the learning progress made. A clear and easy-to-use graphing system helps teachers identify student strengths, weaknesses and progress, and convey these to parents.

Since recognition of coding disability is important in identifying children with learning disabilities, it is also a useful screening and identification tool (Gallistel 1973). It can be particularly useful in developing effective Tier 2 and Tier 3 Interventions, developing

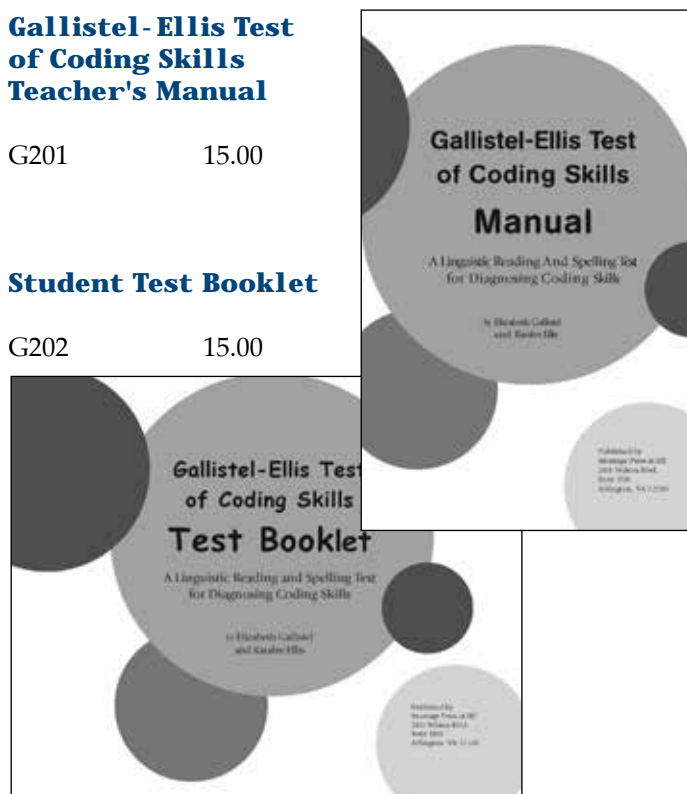

Individualized Educational Programs (IEPs), and monitoring progress.

Silver Moon Spelling Rules - Set 1 (author Kelly Steinke)

This creative and supplemental spelling program teaches 20 American English spelling rules and 1 reading rule. Each spelling rule has been given a catchy name and image to support memory. Picture clues are strategically placed within each image to further support memory and active student engagement. All 21 rules are presented on a full color, double sided spelling rule card (flash card) and are accompanied by a multi-sensory, direct instruction lesson. Students stay actively engaged while they build their understanding of spelling rules. Students collect all 21 rule cards and are challenged to apply their learning to real and nonsense words.

This program was made to use with struggling spellers. Included in the manual are pre- and post-tests, independent practice pages, and additional resources that can be requested and downloaded for free. Use with small groups or one-on-one instruction and save yourself time and frustration!

Included:

- Instructor's Manual
- Instructor's Spelling Rule Cards (21 6x8.5 cards)
- One Pack of Student Spelling Rule Cards (21 3.5x5.5 cards)

Silver Moon Spelling Rules - Set 2 (author Kelly Steinke)

Silver Moon Spelling Rules is a supplemental spelling program that takes the guesswork out of spelling. Explicit instruction in spelling rules allows students to stop memorizing and start understanding. This program is not grade leveled and should be used after parts 1 and 2 of Silver Moon Spelling Rules, Set 1 have been mastered. This is an Orton-Gillingham influenced program.

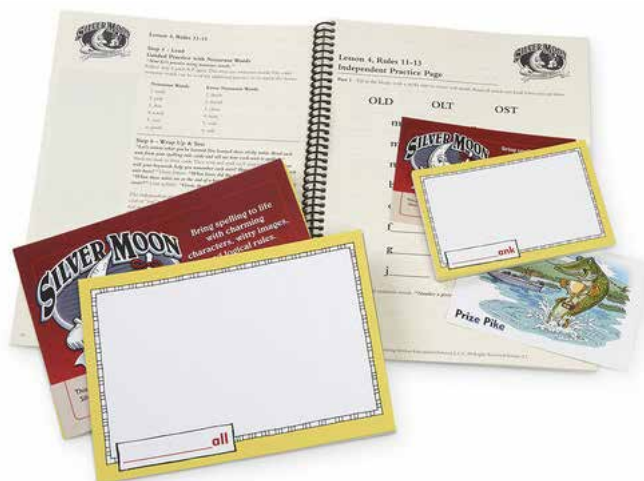

Set 2 directly teaches 15 sticky units of sound, 7 reasons for silent E and 8 silent E sticky units. Spelling rules are accompanied by direct-instruction, multi-sensory lesson plans and spelling rule cards. The manual includes 14 lessons.

Included:

- Instructor's Manual
- Instructor's Spelling Rule Cards (21 6x8.5 cards)
- One Pack of Student Spelling Rule Cards (21 3.5x5.5 cards)

Contents:

- Doodle-a-Rule" cards
- Logical (yet creative and fun) names to pair with American English spelling rules
- Full color pictures with hidden clues
- Teacher Talk (the manual tells you what to say!)
- Direct Modeling of new skills
- Guided Instruction with real words and nonsense words
- Reproducible student pages
- Pre- and Post-tests
- Additional support materials online

Rummy Roots & More Roots

Each game (or level) is designed to be fun and stress-free for children and adults:

Pre-Roots

- played like "GO FISH"; teaches English meanings to the 42 Greek and Latin roots in each game; uses common roots (e.g., micro, phone)

Level 1

- combine 2 Greek or Latin root cards together to form English words (e.g., Auto + Graph = Autograph); players are introduced to the words used in all levels

Level 2

- played like Level 1 except that students also learn definitions of 2 root combinations

Level 3

- similar to "Rummy"; players include 3 root card combinations from the Roots and More Roots Dictionaries (example: Auto + Bios + Graph = Autobiography); stretches players from familiar to unfamiliar words

- students identify the pictured word and then spell it
- students delight in practicing spelling in an out-of-the-ordinary way and remember the rules by associating them with pictured rather than spoken words
- drawings provide the words within a language-rich context (e.g., the picture for “dinner” shows a family seated for a meal -- opportunity for oral language practice and discussion)
- provides hours of engaging spelling practice and is the perfect way to connect the Spelling Rules Tubicles and a spelling activity.

Quality Material and Quality Instruction

Fun Phonics materials are organized in a progression that will be familiar to teachers trained in Orton-Gillingham and other phonics-based programs. However, this training is not required to use the program successfully. The comprehensive and easy-to-follow Teacher's Manuals enable the materials to be used by teachers and tutors who have not "learned the rules" of our complex language system. Teachers can rely upon the careful selection and progression of word choices and the scripts provided to help students recognize the patterns which underlie English. While these materials are often used in special education resource rooms and by private schools for children with learning disabilities, they are also well-suited for use by teachers and tutors in Response to Intervention Programs (RTI) providing small-group instruction for Tier 2 students. Use of the Gallistel-Ellis Test of Coding Skills will help focus instruction on the specific coding/decoding skill which a student in any RTI tier lacks and will measure progress in attaining these skills.

These materials rely upon principles which are supported by recent brain research. The brain constantly searches for patterns. When it recognizes these patterns, it can incorporate them and build complex frameworks which support automatic retrieval. Careful selection and presentation of the differing patterns of written English enable the struggling reader to remember and gain automaticity in this pattern recognition.

About the Research

These research-based methods and materials have been used successfully in public and private schools throughout the United States and Canada. The most intensive test of the method took place from 1998 through 2004 in five, low-income, ethnically mixed schools in a mid-sized New England urban area. The 100 poorest readers in these five Title I schools were given two years of supplemental instruction using this method, in addition to classroom reading instruction, in first and second, or second and third grade. At the end of second grade, 69 percent of those students were no longer in the state's remedial category on the national Degree of Reading Power (DRP) test. In the one school that tested the method in second and third grades, between 64 and 76 percent of the students in different years moved out of the remedial category according to the DRP post-test. On the state story reading test the students did even better, with successes ranging from 86 to 92 percent.

Praise for Writing Matters

It isn't often that a gifted teacher shares his success in such a teachable manner. This complete, comprehensive instructional guide demystifies the process of teaching grammar and writing while addressing the research and linking the Core Standards. William provides the rationale, the important principles, many examples, plus a wealth of activities and suggestions for successful implementation of a systematic, structured, spiraled process that is useful and appealing to teachers and students. It makes sense!

Arlene Sondag, Fellow/AOGPE, Author, Sondag System

When I saw this in action, I immediately wanted it for my class. I went to school the following Monday and began teaching it. Within a few lessons, my students were already becoming stronger writers.

Mary Baldwin, Sixth Grade Department Chair, The Briarwood School

The deeper that you get into this remarkable resource the more you realize that William Van Cleave's systematic commonsense approach to writing and the understandable conceptual exercises this book provides have immense potential. You will be a better teacher, you will be more successful, and you will be more efficient with this book at your side.

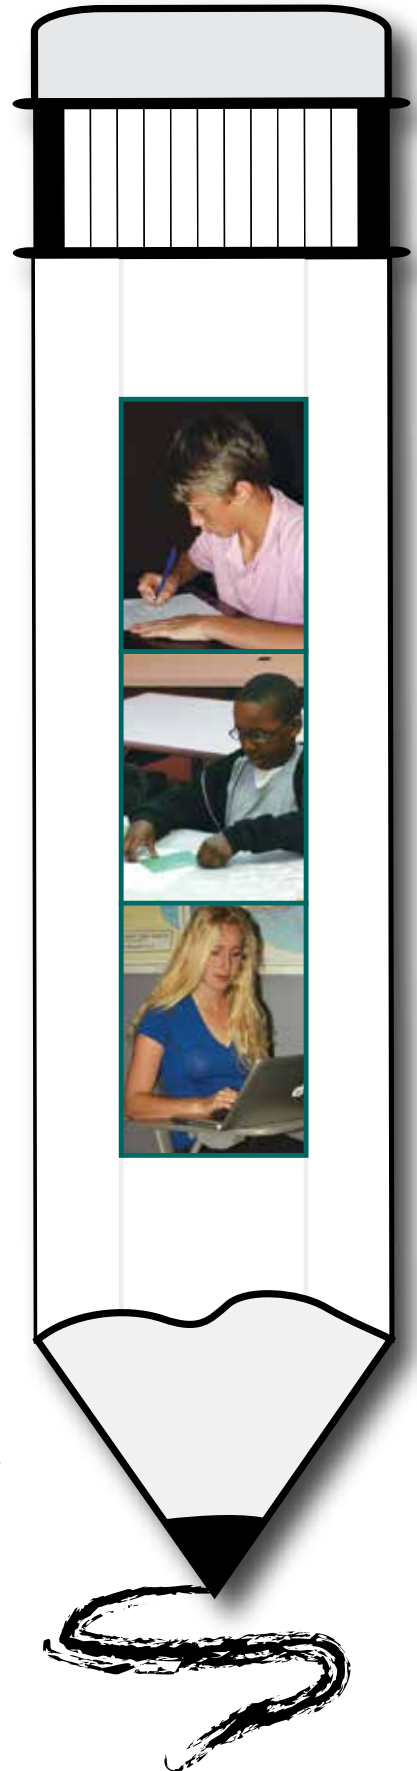

*Emerson Dickman, J.D., Past President, International Dyslexia Association
Member, National Joint Committee on Learning Difficulties*

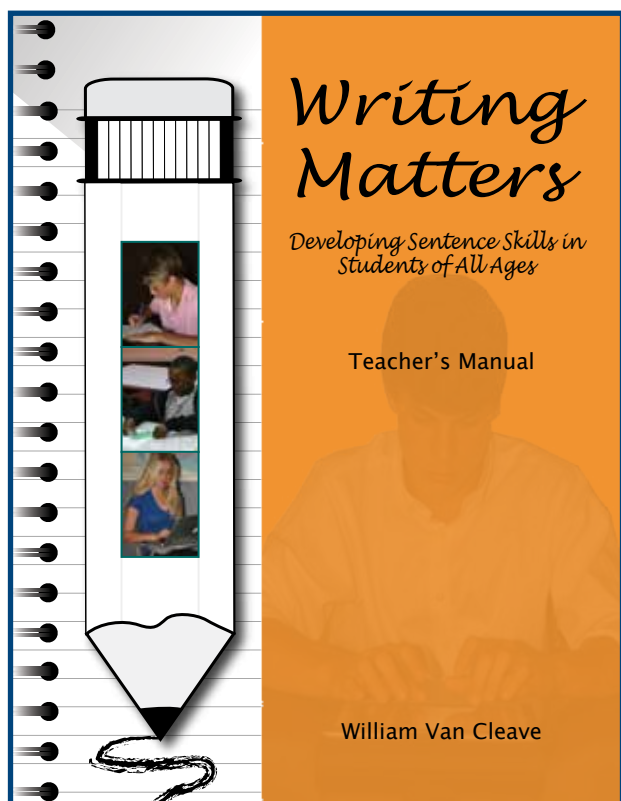

In recent years the writing of students has suffered from their failure to receive instruction in grammar. Students nowadays write using the informal language of speech and do not understand how to compose structured sentences. We must teach grammar to enable our students to become better writers. William Van Cleave's book, *Writing Matters*, certainly accomplishes this goal by providing a plethora of diverse and engaging exercises. The book serves as an indispensable guide for teachers working with students at any level and is truly a godsend.

Diana Hanbury King, Fellow/AOGPE, Author, Writing Skills series

Teaching grammar is difficult, but teaching this subject to students with dyslexia offers a greater challenge. Now, William Van Cleave's book, *Writing Matters*, presents grammar in a systematic, sequential, and structured manner. Students have opportunities to learn about parts of speech through a variety of activities that let them see these components as tools that can be manipulated in sentence construction. Sentence writing is the ultimate application of this process. *Writing Matters* is a must-have book for any teacher because it is comprehensive. *Writing Matters* will be a book our students can use from grade to grade as they master the structure of the English language to become better writers.

Pat Porter, Fellow/AOGPE

Barebones Grammar for Reading & Writing Curriculum

(author Wendy Stacy)

The Barebones Grammar for Reading and Writing curriculum provides an engaging, fast-paced, systematic, and explicit multisensory method for teaching sentence analysis and basic sentence and paragraph writing skills. Each lesson guides students through a 3-step process: Analyze, Diagram, and Generate.

Students utilize a concise set of Grammar Questions to analyze sentences to discover the function of the words in the sentence. Using the Grammar Questions, they then create a visual picture of the sentence through diagramming. Lastly, the students use

the Grammar Questions to generate and expand new, original sentences. Over time, consistent usage of the Grammar Questions allows students to develop an internal, inquiry-based process for word and sentence analysis that results in an increased understanding of how spoken and written words work together in the English Language. In addition, students learn a systematic and sequential approach to paragraph writing. Students learn to construct 3- to 11- sentence paragraphs utilizing graphic organizers.

- (1) set of colored Sentence-Building Cards
- (1) game board

At last, a grammar game that focuses on sentence-building skills! Designed as a classroom complement to the curriculum, the Board Game may be used in any language arts classroom to deepen students' grammar knowledge base and sentence-building skills. As they move around the game board, students answer questions from one of five separate decks (General Grammar, Noun Jobs, Sentence Structure, Parts of Speech, and Capitalization/Punctuation), collect colored sentence-building squares, and build original sentences. Students play until one player reaches the Finish line. The student who has built the most complex sentence wins the game!

Tactile Surfaces

Red Grids

- red plastic grids provide texture during writing and reinforce words that need to be memorized
- one grid sheet can be cut to size - generally allows 3-4 smaller student-sized grids per sheet

P011 Red Grids 1.00

Brain Freeze

- just add water and watch as the crystals expand to create a tactile treasure for your students!
- crystals can be used for dictation in a plastic tray or other activities
- bag provides enough for five small trays
- Brain Freeze is reusable again and again!

P013 Brain Freeze 7.50

Smart Sand

- writing in sand is a fun, multisensory activity everyone will enjoy
- two-toned sand is dual-textured, allowing the thicker black sand to reveal the finer green sand underneath
- approximately 3/4 pound of sand per student tray recommended (1.5 pounds in each bag!)

P019 Smart Sand 5.75

Smart Tray

- sturdy plastic tray
- provides the perfect amount of space for writing with Smart Sand
- bright blue color provides an added visual contrast
