

Morphology Matters

Building Vocabulary Through Word Parts

By William Van Cleave • WVCED.com

I. Introduction

- a. word knowledge & active vs. passive vocabulary
- b. motivation for teaching morphology
- c. terminology
- d. difference between phonological & morphological study (“cat”)
- e. Anglo-Saxon, Latin, Greek: sorting by origin

II. First Level Morphology

- a. Anglo-Saxon base words & affixes
- b. basic parts of speech for suffixing

III. Second Level Morphology - Latinate Words

- a. Latin bases and affixes
- b. elements of a lesson
- c. suffixes versus final stable syllables
- d. Latin template & connectives

IV. More Advanced Elements (as time permits)

- a. Greek template
- b. Greek combining forms
- c. -ti-, -ci-, & -tu-
- d. assimilated/chameleon prefixes

Different Kinds of Vocabulary & Levels of Word Knowledge

Passive & Active Vocabulary:

A person's **active** (expressive) vocabulary is a smaller subset of her **passive** (receptive) vocabulary; in other words, she knows far more words than she uses.

Of the approximately 175,000 words in current use—750,000 if you take into account polysemy (multiple meanings)—a typical college-educated adult has a vocabulary of about 40,000 words, uses about 20,000 when she writes, and uses only about 10,000 of that 20,000 when she speaks.

Instructors should choose vocabulary words carefully. Also, if a student needs only to *recognize* a word in text, instruction can be less intense. If a student needs to be able to *use* the word, instruction will need to include a deeper understanding and application practice.

Word Knowledge:

Before teaching a word to students, show them the word and ask them to rank it on a scale of 1 to 5 by how well they know it. This activates any prior knowledge of the word.

Vocabulary Categories:

Reading vocabulary:

words you recognize when you read (typically the largest vocabulary)

Listening vocabulary:

words you recognize when listening to speech (increased by context and tone of voice)

Writing vocabulary:

words you use when you write (many written words do not usually occur in speech)

Speaking vocabulary:

words you use in speech (typically a subset of listening vocabulary)

Notes:

Terminology for Morphology Study (K-2)

<u>affix</u>	prefix or suffix that can be attached to the base
<u>base</u>	morpheme that holds the core meaning of a word; every word has one stands alone; often called base word (e.g., <u>port</u> , <u>kind</u>)
<i>free base</i>	
<i>bound base</i>	only appears as part of a larger word (e.g., <u>struct</u> , <u>mit</u>)
<u>base word</u>	free base; word even when no affixes are added (e.g., <u>kind</u>)
<u>final stable syllable</u>	cluster of letters at the end of a word whose pronunciation remains consistent regardless of the word in which it appears (e.g., <u>-tion</u> , <u>-ble</u> , <u>-ture</u>); <i>not</i> synonymous with the term suffix
<u>morpheme</u>	smallest component of a word that has meaning
<u>phoneme</u>	smallest unit of speech sound (e.g., /b/, /ch/)
<u>prefix</u>	affix placed before the base of a word (e.g., <u>pre-</u> , <u>ab-</u>)
<u>root</u>	word in an origin language from which English bases are derived; (sometimes, the term root is used to identify bases)
<u>suffix</u>	affix placed after the base of a word
<i>derivational (lexical):</i> (shifts part of speech)	vowel: -able, -ance, -ate, -ish, -ive, -ize, -ous, -us consonant: -ly, -like, -ment, -ful, -tude, -less
<i>inflectional (grammatical):</i> (does not shift part of speech)	vowel: -ed, -er, -es, -est, -ing consonant: -ly, -'s, -s

Some Affixes to Begin With For K-2 Students

Below is a list of affixes good for younger students. Note that all are Anglo-Saxon except re-, which comes from the Latin.

Basic Prefixes		Basic Suffixes	
un- (not)	unlock	-s (plural)	cups, books
re- (again)	rewrite	-es (plural)	dishes, boxes
re- (back)	return	-ing (present part.)	jumping
		-ed (past part.)	jumped
		-er (person)	teacher
		-er (comparative)	larger
		-est (superlative)	largest
		-ful (full of)	careful
		-less (without)	nameless

Terminology for Morphology Study

<u>affix</u>	prefix or suffix that can be attached to the base
<u>base</u>	morpheme that holds the core meaning of a word; every word has one stands alone; often called base word (e.g., <u>port</u> , <u>kind</u>)
<i>free base</i>	
<i>bound base</i>	only appears as part of a larger word (e.g., <u>struct</u> , <u>mit</u>)
<u>base word</u>	free base; word even when no affixes are added (e.g., <u>kind</u>)
<u>final stable syllable</u>	cluster of letters at the end of a word whose pronunciation remains consistent regardless of the word in which it appears (e.g., <u>-tion</u> , <u>-ble</u> , <u>-ture</u>); <i>not</i> synonymous with the term suffix
<u>morpheme</u>	smallest component of a word that has meaning
<u>phoneme</u>	smallest unit of speech sound (e.g., /b/, /ch/)
<u>prefix</u>	affix placed before the base of a word (e.g., <u>pre-</u> , <u>ab-</u>)
<u>root</u>	word in an origin language from which English bases are derived; (sometimes, the term is used to identify bases)
<u>suffix</u>	affix placed after the base of a word
<i>derivational (lexical):</i> (shifts part of speech)	vowel: -able, -ance, -ate, -er (noun), -ish, -ive, -ize, -ous, -us consonant: -ly, -like, -ment, -ful, -tude, -less
<i>inflectional (grammatical):</i> (does not shift part of speech)	vowel: -ed, -er (comparative), -es, -est, -ing consonant: -ly, -'s, -s
<u>assimilated prefix</u>	prefix (often nicknamed chameleon) where, for ease of pronunciation, the final letter changes according to the initial letter of the base to which it is attached (e.g., <u>ad-</u> changes to <u>ar-</u> before <u>range</u> to make <u>arrange</u> ; <u>in-</u> changes to <u>im-</u> before <u>pact</u> to make <u>impact</u>)
<u>element</u>	(sometimes called combining form) often used to describe Greek-based bases and affixes (e.g., <u>phone</u> , <u>crat</u> , <u>phys</u> , <u>epi-</u> , <u>a-</u>)
<u>connective</u>	letter(s) in English words used to combine two morphemes; connectives function as glue and have no meaning (not morphemes)
<i>Latin-based</i>	connect a base to a suffix or two suffixes to each other (e.g., <u>palimony</u> , <u>gradient</u> , <u>monument</u>). <u>-i-</u> and <u>-u-</u> are connectives; while <u>-ul-</u> is sometimes identified as a connective, it is actually suffix <u>-ule</u> , where the <u>e</u> has dropped before a vowel suffix
<i>Greek-based</i>	connective <u>-o-</u> often joins two elements (e.g., <u>photograph</u> , <u>democracy</u>)

note: Because in linguistics the term "root" refers to the word (in another language) from which our current stem or base is derived, base is a more clear term to describe the core meaning in an English word. Often, however, in word study with students, the term "root" is used interchangeably with "stem" and "base."

Phoneme/Morpheme Analysis

Let's figure out the difference between phonology and morphology!

Word	Phoneme Count	Morpheme Count
c u p s	_____	_____
b l e n d	_____	_____
p h o n e	_____	_____
c a l l e d	_____	_____
r e c a l l i n g	_____	_____

Identifying Morphemes

Underline the base words. Box the affixes (prefixes and suffixes).

cook	overheated	unworthy
cooking	sunset	worthlessness
overcooked	like	worthiest
heat	likely	understandable
heating	liking	underactive
heater	likelihood	hopefully
preheat	worth	unwholesome

Selecting Word Origins

Label each word as AS = Anglo-Saxon; G = Greek; or L = Latin

sing	surreptitious	regenerate	hundred
mutual	what	phase	evacuate
monochrome	telepathy	those	phonics
forty	from	abbreviate	incredulous
declension	manuscript	phonograph	moat
pyre	pathology	epidemic	recuperate
expenditure	does	miss	
laugh	white	abnormal	<i>bonus words:</i>
orchid	biology	contraception	biodegradable
distribute	consequence	elbow	graphomotor
psychology	watch	philanthropist	subatomic

Identifying Morphemes

Underline the base words. Box the affixes (prefixes and suffixes).

cook	overheated	unworthy
cooking	sunset	worthlessness
overcooked	like	worthiest
heat	likely	understandable
heating	liking	underactive
heater	likelihood	hopefully
preheat	worth	unwholesome

Basic Word Matrix Work

word matrix

un	teach	able
re		er
pre		es
mis		ing

word sums

teach + er → teacher

Discovery Learning

trees = _____

_____ = _____

examples: _____

unhappy = _____

_____ = _____

examples: _____

larger = _____

_____ = _____

examples: _____

leader = _____

_____ = _____

examples: _____

_____ = _____

_____ = _____

examples: _____

Suffixes Both Determine & Change Part of Speech

noun	verb	adjective	adverb
joy	rejoice(s,ing,ed) enjoy(s,ing,ed)	joyous joyful	joyfully
peace		peaceful	peacefully
hunger	hunger(s) hungered hungering	hungry	hungrily
expanse expansion expansiveness	expand(s) expanding expanded	expansive expandable	expansively
darkness dark	darken(s) darkened darkening	dark darker darkest	darkly
act action actor	act(s) acted acting	active	actively
loudness		loud louder loudest	loudly
dependence	depend(s) depended depending	dependent dependable	dependently
sleep sleeper sleepiness	sleep(s)	sleepy	sleepily

Note: -ed and -ing verbs can also serve as adjectives (called participles).

Morpheme Instruction at the Elementary Level: A Week's Lesson in E.L.A.

1. Introduce.
 - a. Write the morpheme for students to see. Write affixes with dashes to show they attach to bases. (e.g., -s, un-)
 - b. Have students trace and write the morpheme, naming its letters as they write.
 - c. If the morpheme is bound, write it in a keyword to show how it is used.
 - d. Have students pronounce, trace, and write the keyword, naming its letters as they write.
 - e. Explain and write the meaning of the morpheme. (Either use direct instruction or, wherever possible, help students use discovery learning to uncover its meaning.)
 - f. Provide or ask students to create a personal card with the morpheme on the front and its keyword and meaning on the back.
 - g. Using a Post-it, add the morpheme to the morpheme wall or chart.
2. Generate with the students a list of words that contain the new morpheme.
3. Ask questions to help students generate other known words that contain the morpheme. (e.g., for un-: "What would a word be for 'not kind'?" (unkind)
(e.g., for port: "What would a word be for 'to carry back'?" (report))
4. Have students build a matrix or build word sums from an existing matrix for the morpheme.
5. Have students locate and underline the morpheme in words containing it. Alternatively, have the students complete word sorts.
6. Have students participate in morphemic awareness activities (oral manipulation of morphemes in words). Use felts or chips to represent the morphemes you move just as you would for phonemic awareness activities. (See Donah's texts for scripted activities.)

Instructor: Say teach.

Student: teach

Instructor: Add /ing/ to teach.

Student: teaching

Instructor: Change /ing/ in teaching to /able/.

Student: teachable

Instructor: Add the prefix un- to teachable.

Student: unteachable

7. Have students read phrases/sentences that include examples of words containing element.
8. Provide word, phrase, and sentence dictation that includes examples of words containing element.
9. Have students write sentences with words containing element.
10. Have students locate words that contain familiar prefixes and bases in paragraphs or longer pieces.

* *Games and other activities can be added or even used instead of some of the activities above. See separate page of supplemental activities.*

Morpheme Instruction at the Middle & High School Level: A Week's Lesson in E.L.A.

1. Introduce.
 - a. Write the morpheme for students to see. Include appropriate dashes for affixes. (e.g., pre-, contra-, -ment, -age *but* port, struct)
 - b. Have students trace and write the morpheme, naming its letters as they write.
 - c. Write the morpheme in a keyword to show how it is used.
 - d. Have students pronounce, trace, and write the keyword, naming its letters as they write.
 - e. Explain and write the meaning of the morpheme. (Either use direct instruction or, wherever possible, help students use discovery learning to uncover its meaning.)
 - f. Provide or ask students to create a personal card with the morpheme on the front and its keyword and meaning on the back.
 - g. Using a Post-it, add the morpheme to the morpheme wall or chart.
2. Generate with the students a list of words that contain the new morpheme.
3. Provide definitions, and have students retrieve from memory other, recognizable but less familiar, words that contain the studied morpheme.
4. Have students build a matrix for the morpheme or build word sums from an existing matrix.
5. Have students locate and underline the morpheme in words containing it. Alternatively, have the students complete word sorts.
6. Have students participate in morphemic awareness activities (oral manipulation of morphemes in words). Use felts or chips to represent the morphemes you move just as you would for phonemic awareness activities. (See Donah's texts for scripted activities.)

Instructor: Say constructed.

Student: constructed

Instructor: Change the /ed/ in constructed to /ing/.

Student: constructing

Instructor: Add re to the beginning of constructing.

Student: reconstructing

Instructor: Drop the first prefix and the /ing/ in reconstructing.

Student: construct

Instructor: Add /iv/ to the end of construct.

Student: constructive.

7. Have students read phrases/sentences that include examples of words containing morpheme.
8. Provide word, phrase, and sentence dictation that includes examples of words containing morpheme.
9. Have students write sentences with words containing morpheme.
10. Have students locate words that contain familiar prefixes and bases in paragraphs or longer pieces.

* *Games and other activities can be added or even used instead of some of the activities above. See separate page of supplemental activities.*

Morpheme Instruction for Middle/High School Students In the Content Areas

1. Introduce.
 - a. Write the morpheme for students to see. Include appropriate dashes for affixes. (e.g., pre-, contra-, -ment, -age *but* port, struct)
 - b. Have students write the morpheme, naming its letters as they write.
 - c. Write the morpheme in a keyword to show how it is used. (You choose the keyword.)
 - d. Have students pronounce and write the keyword, naming its letters as they write.
 - e. Explain and write the meaning of the morpheme. (Either use direct instruction or, wherever possible, help students use discovery learning to uncover its meaning.)
 - f. Ask students to make a morpheme card for the term or, alternatively, to add it to the vocabulary section of their notebooks.
 - g. Using a Post-it, add the morpheme to the morpheme wall.
2. Generate with the students a list of words that contain the new morpheme.
3. Provide definitions, and have students retrieve from memory other, recognizable but less familiar, words that contain the studied element.
4. Have students build a matrix for the morpheme.
5. Have students locate and underline the morpheme in words containing it. Alternatively, have the students complete word sorts.
6. Have students read sentences/paragraphs that include examples of words containing element. (This could involve reading the textbook or an article or essay that uses this morpheme.)
7. If you want the term in their active vocabulary, ask students to write sentences with words containing element. A sentence frame may help with this activity.

Bonus Activities:

- A. Have students write a prefix or base in the center, and map or web words that come from that word part. More advanced students can even link those webbed words to other prefixes and base. An example of a simple word web for the Greek element tele is at right.

- B. #6 can be done as a cumulative activity, where students identify words that include any studied element from the year. This practice teaches students to recognize learned word parts and proves their frequency and therefore the usefulness of studying them.

Morphology & The Three Great Spelling Rules

Silent-E Spelling Rule: Drop the e before adding a vowel suffix.

hope + less → hopeless
hope + ed → hoped
in + vade + ing → invading
race + i + al → racial

re + late + ion → relation
place + ate + ing → placating
in + vase + ion → invasion
com + pro + mise + ing → compromising

CVC (or 1-1-1) Doubling Rule: In 1 syllable words ending in consonant-vowel-consonant (cvc), double the final consonant before adding a vowel suffix.

double:

ship + er → shipper
snag + ed → snagged
drug + ist → druggist

do not double:

ship + ment → shipment
last + ing → lasting
host + ess → hostess

Y Spelling Rule: Never drop the y. Keep it or change it. If a word ends in vowel-y, keep the y. If a word ends in consonant-y, change the y to i unless the suffix begins with i.

vowel-y, keep the y:

boy + hood → boyhood
pray + ed → prayed
pay + ment → payment

parlay + ing → parlaying
an + noy + ance → annoyance
em + ploy + ment → employment

consonant-y, change the y to i:

hurry + ed → hurried
study + ous → studious
ready + ness → readiness

fry + ed → fried
party + er → partier

unless the suffix begins with i (which would create a double i):

fly + ing → flying
study + ing → studying

CVC (or 1-1-1) Doubling Rule-Extended: In multi-syllable words ending in consonant-vowel-consonant (cvc), double the final consonant before adding a vowel suffix if the last syllable in the baseword gets the accent.

com + mit + ed → committed
trans + fer + ing → transferring

Do not double if the last syllable does not get the accent.

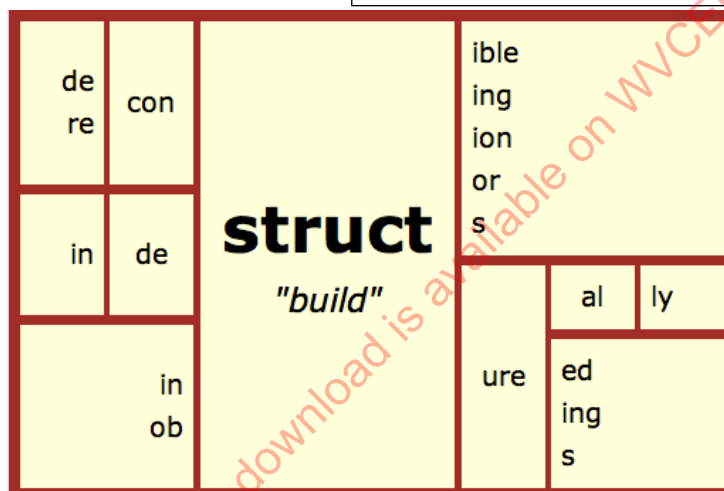

of + fer + ing → offering
lim + it + ed → limited

Supplemental Activities

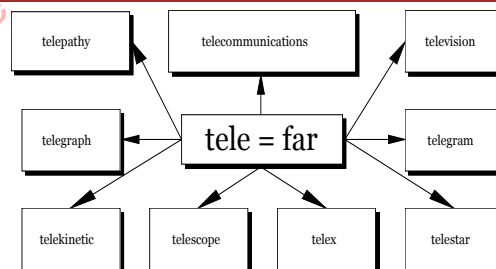

1. Have students write literal definition of given word using knowledge of element meaning, or have them provide word to match provided literal definition (crisscross sheets). An example is at right.

2. Have students build matrix from list of words containing studied element, or have students use teacher-made matrix to generate list of words containing studied element. An example of a matrix for the base struct is at right. (Bowers' *Teaching How the Written Word Works* (wvced.com) explores this practice.

3. Have students write a prefix or base in the center, and map or web words that come from that morpheme. More advanced students can even link those webbed words to other prefixes and bases. An example of a simple word web for the Greek element -tele- is at right.
4. Have students locate words that contain familiar prefixes and bases in magazine or newspaper articles. This practice teaches students to recognize learned morphemes and proves their frequency and therefore the usefulness of studying them.

5. Provide students with a "word of the day," which they must analyze at the phonological (phonemes, syllables, blends/digraphs, etc.) and morphological (language of origin, prefix/base/suffix, advanced structures, meaning if possible) levels. This provides both review and a fascinating study!
6. Here's an activity to generate words from a single base.

Instructions:

- Add prefixes and/or suffixes to the base to create a different word for each blank. Do not use the suffixes -s, -ed, and -ing.
- Many words can be created using two or more suffixes. Occasionally, two and even three prefixes can be used in a single word as well.
- An -s can be added to many of the verbs and nouns you will create. -ed and -ing can be added to many of the verbs you will create to change tense.

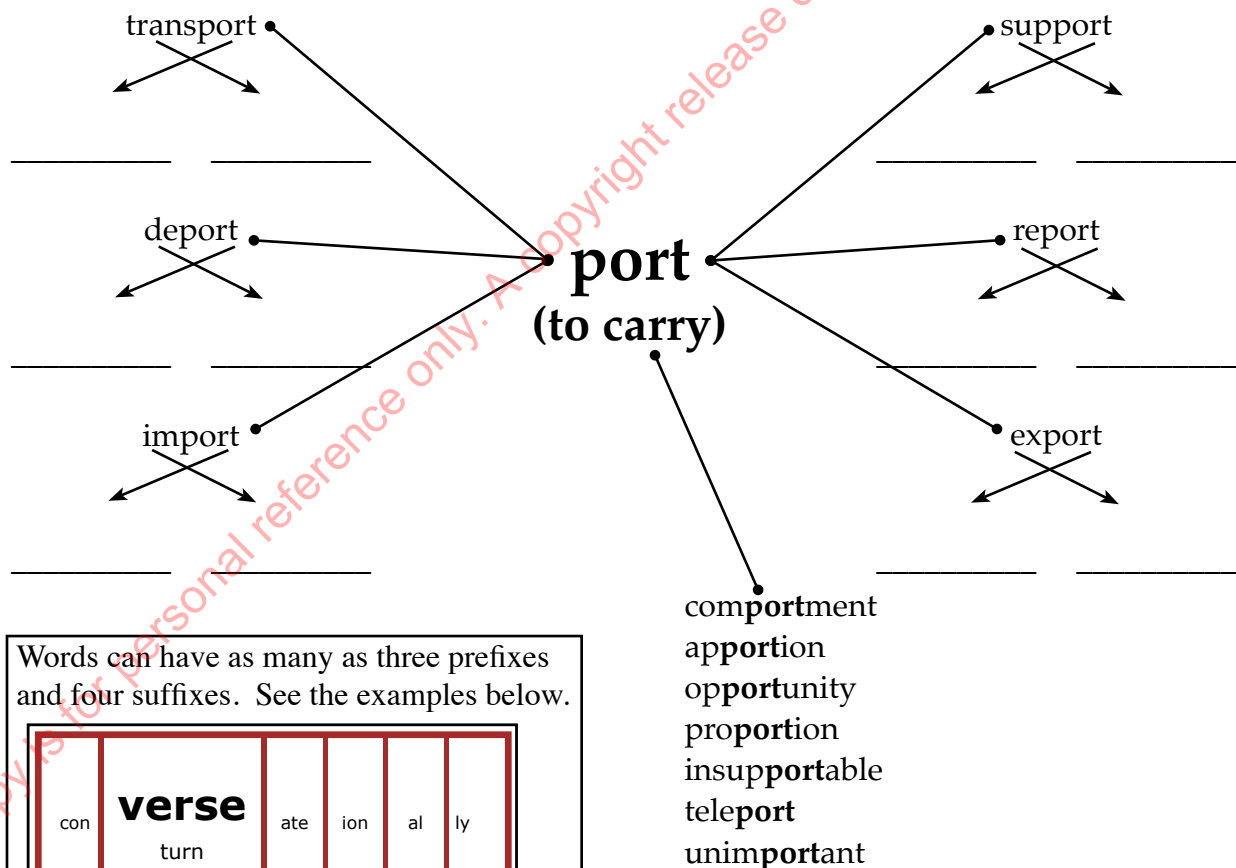

-abl(e) -al -at(e) -(i)fy -il(e) -ion -ist -ity -iv(e) -ly -ness -or -or(y) -ur(e)
 ab- ad- con- de- e- in- inter- non- ob- pro- re- sub tra(ns)- un-
-ject-
 (to throw)

Supplemental Activities (continued)

7. Suffixes often determine part of speech. Examine these words to see how their parts of speech change as different suffixes are added:

prefix	prefix	base	connective	suffix	connective	suffix	suffix
inter	de	part		ment		al	ly
dis	pro	port		ion		ate	ly
	ad	vent		ur(e)		ous	
		nat		ur(e)		al	ly
	re	med	i	at(e)		ion	
	ir	reg		ul(e)		ar	ly

8. A variety of word webs are useful for advanced word structure study. Examine this web, which incorporates criss-cross sheets, for the base port (from Latin).

Words can have as many as three prefixes and four suffixes. See the examples below.

con	verse	ate	ion	al	ly
	turn				

un	com	pro	mise	ing
			"to send"	

A Note on Procedure for Word Origins

A significant conceptual difference exists between basic phonological decoding (division by sound) and morphological work (division by meaning).

With morphology we no longer examine words based on syllabication; rather, we examine them based on parts for meaning. Examples are above at right. Morphological study leads to an understanding of more challenging spellings and an enhanced vocabulary.

phonological division	morphological division
e la tion	e lat ion
in som ni a	in somn i a
con tra dic tion	contra dict ion

Recall & Recognition Drills (taken from Shirley A. Kokesh)

After a concept has been taught, it must be drilled if it is to be remembered. Drills are on two levels:

1. Recognition: Instructor provides a set of potential answers and one question.
Student must choose the correct answer from the given set.
2. Recall: Instructor provides one question.
Student must provide the answer from memory.

A great deal of student failure occurs because teachers tend to go from teaching directly to the higher level drill of recall....or testing! While a small percentage of students can function well in such a system, it places most in a position of threat, uncertainty, and insecurity. If students fail, many times the instructor repeats the procedure instead of adding necessary lower level drills of recognition.

For example: After explaining the meanings of three to six morphemes (teaching), if you then say, "Now let's go through these morphemes again, only this time you tell me the definitions," you are testing (recall) not practicing (recognition).

Instead, after teaching the meanings of several new bases or prefixes, insert the following recognition drill:

1. Put three of the word part cards in front of the student:

port	struct	vide/vise
------	--------	-----------

2. Define one of these bases: "build"
3. The student "recognizes" the base he thinks is right by tapping or removing it, spelling "s-t-r-u-c-t."
4. The teacher places a new card on top of, or in place of, struct and gives the second definition of the drill.
5. If the student chooses the wrong answer, say, "Try again!" Don't display a new card. Rather, define the word that was mistaken so that the student can get immediate feedback to correct his error.
6. When all cards have been drilled, then it is appropriate to go to the testing level (recall). Gather cards in a deck. Flash and test: "Give me the definitions for each card you see."

A Suggested Sequence for First Level Morphology

(Numbers in parentheses cross reference this sequence with my text,
Everything You Want To Know & Exactly Where To Find It.)

Below is a sequence that can be used as a guideline for beginning morphology:

1. Elementary students (and those with fledgling word attack skills) should learn what base words, prefixes, and suffixes are and how they influence a word's meaning. Stick with bases that are free morphemes (can stand by themselves as words). (80-89)

Focus your study on several key areas.

- understanding base words, prefixes, and suffixes
 - identifying base words in longer words (e.g., like in unlikely, chair in chairs)
 - understanding how prefixes change meaning (e.g., misuse means to use *wrongly*)
 - understanding how suffixes change meaning (e.g., cats is more than one cat)
2. Begin a pack of basic prefixes (front is prefix followed by a dash, back is key word above meaning). Some instructors use green (for "go") for prefixes. Students should look at the prefix ("un-" for example) and say "un-, unhappy, not," in that order. (Anglo-Saxon prefixes to start - 85)
 3. Then, build a pack of basic suffixes (front is suffix preceded by dash, back is key word above part of speech). Where useful, include meaning. Often, meanings are abstract and obscure, and studying part of speech is more fruitful. Students should look at the suffix ("-ly" for example) and say "ly, likely, usually an adverb" in that order. (87, 89)
 4. Continue to add basic prefixes and suffixes to the students' learned stacks of cards as you introduce other elements of study. Once you have exhausted those that come from Anglo-Saxon, move into the more basic Latin affixes.
 5. Teach (or review) noun, verb, adjective, and adverb. Without this knowledge, students will not be able to apply their knowledge of suffixes.

Some common suffixes with which to start, sorted by part of speech:

noun: -er, -hood, -ness, -or, -ist, -ment, -ity

adjective: -er, -est, -ful, -ish, -ous, -able, -ible

adverb: -ly

verb: -ed, -ing, -en, -fy, -ate (pronounced /āte/), -ize

6. Teach the way suffixes can change bases; include the terms consonant suffix and vowel suffix.

- silent-e: drop the e before a vowel suffix (95)

e.g., hope + ing = hoping *but* hope + less = hopeless

- cvc doubling: 1 syl. word ending in cons.-vowel-cons., double before a vowel suffix (97)

e.g., tap + ing = tapping *but* ship + ment = shipment
send + ing = sending
cook + ed = cooked

- y: never drop the y. keep it or change it. vowel-y, keep the y (99)

cons.-y, change the y to i unless the suffix begins with i.

e.g., cry + ed = cried *but* stay + ed = stayed
cry + ing = crying

7. Often in elementary school, students will have learned some final stable syllables. If these stable syllables are introduced at an earlier stage, it is only for decoding and spelling. Note: While all of these are final stable syllables, only some are suffixes.

Useful stable syllables to study at first: -tion (155), -ture (161), -age (147),
-ous (151), -sion (155), -ate (149), -ive (173)

Put these on cards, complete with hyphen. On the front should be the final stable syllable. On the back should be the pronunciation and a key word.

8. (for students with at least 3th grade word attack) Teach the two sounds of c and g. A number of upper elementary and middle school words contain soft c and g, and a number of bound bases at the next level of morphology contain soft c and g as well.

- two sounds of c and g (c and g are soft before e, i, and y) (37)

e.g., cent, cider, cycle, cyst, gentle, ginger, gym (words)
e.g., cide, cess, gene, cept, cede (bound bases)

9. (for students with at least 4th grade word attack) Teach the Greek Code for reading/decoding. Have your students read words that contain elements of the Greek code on cards. Where appropriate, such words can also be dictated for spelling. Students should learn that words containing these elements usually come from the Greek.

- y acts as i; ch says /k/; ph says /f/ (131)

e.g., cyclone, python, echo, chronic, phylum, elephant

A Suggested Sequence for Second Level Morphology

(Numbers in parentheses cross reference this sequence with my text,
Everything You Want To Know & Exactly Where To Find It.)

Though advanced language study is flexible, it is useful to have in mind a sequence to guide your teaching. The sequence you choose depends on the level of the student, the academic courses that student is taking, or a combination of both. Below is a sequence that can be used as a guideline for students who have achieved at least fourth grade word attack skills. *Cover concepts on First Level Morphology sequence before beginning with these more advanced elements:*

1. Begin a pack of four or five basic prefixes (front is prefix followed by a dash, back is key word above meaning). Some instructors use green (for “go”) for prefixes. While assimilated (chameleon) prefixes are some of the most common, if you use them at this stage, stick to their basic forms and avoid their assimilations (e.g., study in but not im, il, or ir). Students should look at the prefix (“pre-” for example) and say “p-r-e, preview, before,” in that order. (regular prefixes - 112-4; assimilated prefixes - 115-23)

8 good prefixes to study at first: pre-, in-, con-, re-, inter-, trans-, ex-, dis-

2. Then, build a pack of four or five bases (front is base surrounded by dashes, back is key word above meaning). Students should look at the base (“rupt” for example) and say “r-u-p-t, interrupt, to break,” in that order. (124-7)

good bases to study at first: port, rupt, dice/dict, ject, mit/miss/mise, spece/spect/spice

3. From there, build separate packs of prefixes and roots. Stick to one language of origin for a time before introducing elements of another language.
4. At this point, look at common endings, layering in part of speech and other important information. A knowledge of nouns, verbs, adjectives, and adverbs is important for this study. Continue to build your pack of stable syllables and suffixes. Have your students practice reading and spelling words containing these elements. Here are a few examples of useful final stable syllables; more can be found in the text:

- a. useful final stable syllables (almost all of which are suffixes) to study at first:

-ment (noun): argument, investment (146)
-ist (people noun): florist, dentist (147)
-or (people noun): instructor, tutor (147)
-ture (noun): nature, adventure (161) (The suffix here is -ure.)
-ize (verb): utilize, systematize (171)
-ive (adjective): talkative, active (173)

Note: While all the endings above are final stable syllables, -ture is not a suffix.

b. final stable syllable /shun/ (155)

-tion: most common	-sion (/shun/): after s, n, l (/zhun/): after vowels/r	-cian: for people
nation	propulsion, invasion	musician

(Note: The t, s, or c in these syllables is part of the preceding morpheme, leaving -ion as the suffix and -ian as connective -i- + suffix -an.

c. -ous (adjective): dangerous -us (noun): circus (151)

d. -ate (/āt/ - verb): locate -ate (/ět/ - adjective/noun): immediate, pirate (149)

5. As students build packs of prefixes, bases, and stable syllables, introduce the major word origins (Anglo-Saxon, Latin, Greek, and maybe French), and discuss their characteristics. Have students practice identifying words by their origins. Remember that the study of advanced word structure is cognitive. In other words you need to teach *how* the language works. Little of this concerns rote memory. (176-8)

6. Teach students that -ti- and -ci- say /sh/. Use students' base knowledge of -tion to get to this. (In other words, "if tion says /shun/, what does ti say?") Then, expand your stable syllable pack with /sh/ syllables. You should have a large pack of multisyllabic words that contain these /sh/ structures for reading and eventually spelling. (152-7)

-tion = /shun/	-cian = /shun/		
-ti- = /sh/	-ci- = /sh/		
-tial = initial	-tious = nutritious	-cial = racial	-cious = ferocious
-tient = patient	-tiate = initiate	-cient = ancient	-ciate = associate
		-ciency = efficiency	

(Note: The initial c or t is a part of the base while the letters that follow form the suffix.)

7. Then, teach students -ture (as you taught -tion) and -tu- (as you taught -ti-). (158-9)

-ture = /cher/ as in adventure

-tu- = /choo/ as in mutual, spatula

8. As students continue to build packs of prefixes, bases, and stable syllables, examine the template of a typical Latinate word. Teach the Latin connectives (-i-, -u- and maybe -ul-, though it is actually suffix ul(e) before a vowel suffix). Teach the pronunciations of Latin connective i (e.g., medium, million, aptitude). (111)

9. Eventually, teach the breakdown of a word of Greek origin (including elements and connective o). (129)

10. Teach assimilated/chameleon prefixes from the Latin. (115-23)

A Technique for Reviewing Word Parts & Vocabulary Terms Independently

To study your cards use "The Box Method"!

1) Put down 4 cards to form your "BOX"

Word up, definition down:

democracy	convention
primary	delegate

2) Quiz yourself

Pick up a card, do you know the definition?

YES! Set it aside, and place a new card in your box.

NO... carefully review the back of the card until you feel you know it, then put it back in your box, and choose another card from your box to answer.

No card leaves the box until you get it right once. Keep putting aside the cards you know and reviewing the ones you don't until you know them all!

3) Now try it with the definitions up!

This is a much more effective way to learn your cards than just flipping through the deck!

"The Box Method" William Van Cleave & Shirley Kokesh
Instruction sheet by Susan Schambach and Cheryl Swanson, Triad Academy, Winston-Salem, N.C.

Identifying Morphemes: The /shun/ Question

1. Underline the base. 2. Box any affixes. 3. Circle any connectives.

contraction

regression

magician

Guess

c o n t r a c t i o n

r e g r e s s i o n

m a g i c i a n

Correct
Answer

c o n t r a c t i o n

r e g r e s s i o n

m a g i c i a n

Sample Activity: Sister Words for Shared Meaning

challenge	sister word	shared meaning
perturbed	disturb	-----
benefactor	benefit	-----
rupture	disrupt	-----
amiable amicable	amigo	-----
envision	vision	-----
enclosure	close	-----
antibiotic	antisocial	-----
	biology	-----
autobiography	automobile	-----
	biology	-----
	paragraph	-----
euphony	euphemism	-----
euthanasia	eulogy	-----
geothermal	geography	-----
	Thermos	-----

Sample Activity: Latin and Greek Word Generation

Underline a morpheme and list other words that share that morpheme.

beneficial

biography

thermometer

autograph

legal

position

Latin template: 55% of English words

Greek template: 11% of English words

Sample Activity: Identifying Morphemes

Underline bases, circle connectives, and box affixes.

Latin structure

confide

eruption

counterproposal

regenerative

Greek structure

psychometrics

photographic

synchronize

sympathetic

Sample Activity: Using Matrices for Word Building

in	de			al	ly
in ob			ure	ed ing s	

structure

Sample Activity: Sort Words by Common Morpheme

benevolent	compelling	benefactor	pedal
pedometer	polygamy	compulsory	impulsivity
polyester	expedient	polygon	beneficial
repulsive	benign	impediment	polyglot
<u>pede</u>	<u>poly</u>	<u>bene</u>	<u>pel / pulse</u>
-----	-----	-----	-----
-----	-----	-----	-----
-----	-----	-----	-----
-----	-----	-----	-----

Sample Activity: Continuum Vocabulary

angry	irascible	smart	shrewd
raging	infuriated	intelligent	insightful
wild	enraged	clever	brainy
tempestuous	irate	fast	wise
wrathful	provoked	sharp	bright
furious	aggravated	astute	brilliant
mad	livid		
huffy	indignant		
hot under	outraged		
the collar			

Latin Connectives Practice Sheet

Underline bases, circle connectives, and box affixes.

expedient	spatula
muscular	alleviate
petunia	testimony
magnitude	impediment
virtuous	imperial
continual	egregious
gratify	radiant
hysteria	unofficial
spectacular	appreciate
monument	editorial
cautious	malicious
deficiency	exponential
popular	suburbia
evaluate	injurious
tempestuous	parsimonious
brilliant	marsupial

Three key Latin connectives are i, u, and ul. Be aware that connective ul is actually suffix ule, where the e has dropped before a vowel suffix. You should accent the syllable that comes before the Latin connective:

sói tude món u ment rég ul ate

u and ul are always long:

promiscuuous manuul musculur

Latin connective i is by far the most common.

Use these rules for pronouncing it:

1. i = /ē/ before a vowel suffix: curious
2. i = /y/ after l or n: peculiar
3. i = /ĩ/ before a consonant: multitude

A sampling of useful suffix rules:

-ous = adjective -ate /āt/ = verb
-us = noun -ate /ět/ = adj./noun

Exploring Assimilated Prefixes

Explanation: For ease of pronunciation, the final letter of an assimilated prefix changes according to the initial letter of the base to which it is attached. These prefixes are often nicknamed chameleons because a chameleon changes its colors to blend with its surroundings, much like the assimilated prefix.

ex and dis:

ex drops x (e.g., eject), dis, drops s (e.g., divide)

ex changes to ef before f (e.g., effect), dis changes to dif before f (e.g., differ)

(rare ex: ex changes to ec in some situations)

ad:

ad retains d before d (e.g., addition)

ad to ac before c (e.g., accelerate)

ad to af before f (e.g., affect)

ad to ag before g (e.g., aggressive)

ad to al before l (e.g., alliance)

ad to an before n (e.g., announce)

ad to ap before p (e.g., apply)

ad to ar before r (e.g., arrange)

ad to as before s (e.g., assert)

ad to at before t (e.g., attract)

ob and sub:

ob to oc before c (e.g., occasion), sub to suc before c (e.g., succeed)

ob to of before f (e.g., offer), sub to suf before f (e.g., suffer)

ob to op before p (e.g., opponent), sub to sup before p (e.g., support)

(rare ob: o before m; os before c or t)

(rare sub: sug before g; sum before m; sur before r; sus before c, p, or t)

in and con:

in can retain n before n (e.g., innate), con retains n before n (e.g., connect)

(rare: in can change to ig before n)

in to im before b, m, p (e.g., imbalanced), con to com before b, m, p (e.g., combine)

in to il before l (e.g., illegal), con to col before l (e.g., collect)

in to ir before r (e.g., irrational), con to cor before r (e.g., correct)

Examples

ex → ef + fort = effort

dis → dif + fer = differ

ad → ar + rest = arrest

ob → op + posite = opposite

sub → sup + pose = suppose

in → im + bibe = imbibe

con → com + bine = combine

sample
activities

in + regular = irregular

in + regular = irregular

irregular = not regular

not regular = irregular

*Note: The word lists accompanying these morphemes were developed for **high school** students. Some words should be omitted for younger students.*

Morphemes in the Content Areas: Content-area instructors have the opportunity to show how morphemes function in words specific to their subject. Exploring words' common morphemes and shared meanings proves fruitful for vocabulary development—to help students understand both words instructors are teaching and those that may be encountered in the future.

gen/gene - birth, origin (common science morpheme)

androgen	eugenics	genitals	hypoallergenic
allogenic	genealogy	genius	neurodegenerative
biogenesis	general	genteel	overgeneralize
biogenetic	generalize	gentle	oxygen
carcinogen	generate	gentleman	pathogen
congenital	generative	gentry	photogenic
congenitally	genetic	genus	primogenitor
degenerate	geneticist	heterogeneous	regenerate
eugenicist	genial	homogeneous	transgenerational
estrogen	genitalia	hydrogen	

crat/cracy - rule or government by (common history morpheme)

aristocracies	isocracy
aristocrat	meritocracy
aristocratic	mobocracy
autocrat	nondemocratic
bureaucrat	technocrat
bureaucracy	theocracy
bureaucratic	theocrat
democracy	undemocratically
democrat	

arch - chief/principal (common history morpheme)

anarchy	monarch
anarchism	monarchies
archbishop	monarchy
archdiocese	nonhierarchical
hierarchical	oligarchy
hierarchy	patriarch
matriarch	patriarchal
matriarchal	patriarchy
matriarchy	tetrarchy

Common Morphemes (William Van Cleave compilation - from *Everything* text)

morpheme	meaning	sample word
----------	---------	-------------

Anglo-Saxon Prefixes

a-	on, in	across
for-	away, against	forbid
fore-	before, ahead	forehead
mis-	wrong(ly)	mistake
out-	beyond	outlaw
un-	not	unhappy
under-	below	underrate

Anglo-Saxon Suffixes

-ed	past tense	jumped
-ly	adverb	likely
-ful	quantity noun	spoonful
	adjective	doubtful
-ful + -ly	adverb	hopefully
-less	adjective	worthless
-ness	noun	darkness
-ing	verb	digging
-er	comparative adj.	greater
-est	superlative adj.	greatest
-ish	adjective	brownish
	verb	furnish
-hood	noun	adulthood

morpheme	meaning	sample word
----------	---------	-------------

Latin Prefixes

ab-, abs-	away from	absent
circum-	around	circumference
contra-counter-		
	against	contradict
de-	down from,	descend
	concerning	
extra-	beyond	extraordinary
inter-	among, between	interrupt
multi-	many	multimillionaire
per-	through	perforate
	completely	perfect
post-	after	postpone
pre-	before	preview
pro-	for, forth	proceed
re-	again	recopy
	back	reject
se-	apart from	separate
super-	over	supervise
trans-	across	transport

Assimilated Latin Prefixes

Often, instructors teach the core prefix (e.g., ex-) early on, returning later to add its assimilations when students are ready.

ex- (e-, ef-)	out of	exit
dis- (di-, dif-)	apart	distant
	not	dissatisfied
ad- (ac-, af-, ag-, al-, an-, ap-, ar-, as-, at-)	to, toward, at	advance
ob- (oc-, of-, op-)	object	against
sub- (suc-, suf-, sup-)		
	under	submarine
con- (com-, col-, cor-)		
	with, together	construct
in- (im-, il-, ir-)	in	invade
	not	insane

Common Morphemes (William Van Cleave compilation - from *Everything* text)

morpheme	meaning	sample word
Latin Bases		
<i>transparent</i>		
aud	hear	audio
dice, dict	say	dictate
ject	throw	eject
mise, miss, mit	send	mission
mobe, mote, move	move	move
pel, pulse	push	expel
port	carry	portable
rupt	break	interrupt
scribe, script	write	script
spece, spect, spice	see	spectacles
tract	drag, pull	tractor
vide, vise	see	video
<i>main list</i>		
cape, capt, ceive, cept, cipe	take	capture
cede, cess	go, yield	recede
cide, cise	cut, kill	scissors
claim, clame	call out	exclaim
clause, close, clude, cluse	close, shut	closet
crede	believe	credit
course, cur, curse	run	current
duce, duct	lead	educate
face, fact, fect, fice	make	factory
feder, fide	trust	federal
fer	carry	refer
fine	end, limit	finish
flect, flex	bend	flexible
form	form	form
gene, gener	birth, origin	gene
grade, gress	walk, step, move	progress
lect, lege, lige	choose, speak, read	elect
pede	foot	pedal
pend, pense	hang, weigh	pendulum
plice, ply	fold	reply

morpheme	meaning	sample word
pone, pose, pound	put, place	position
press	press	press
quest, quire, quise	ask, seek	question
sede, side, sess	sit	residence
sense, sent	sense, feel	sensitive
sist, stance, stant, state, stite	stable	stand
spire	breathe	inspire
struct	build	structure
tain, tene, tine	hold	container
tend, tense, tent	stretch, strain	tension
vail, vale	be strong, power	value
vene, vent	come	convention
verse, vert	turn	invert
vite, vive	live	survive
voce, voke	call	vocal

There are a number of Greek morphemes worth learning though Greek bases and affixes typically appear in more specialized vocabulary.

Of the many Greek morphemes, graph, gram, which means write, is particularly common and worth teaching first. Others can be found in the *Everything* text.

Science Morphemes (Ron Yoshimoto compilation)

morpheme	meaning	sample word	morpheme	meaning	sample word
aero	air	aerobes	enter	intestine	gastroenteritis
amphi	both	amphibian	entom	insect	entomology
angio	vessel	angiogram	epi	upon/on	epidermis
antho	flower	another	erg	work	ergonomics
anti	against	antibody	exo	out	exotoxin
arthro	joint	arthritis	ferro	iron	ferrite
astro	star	astronomy	fiss	split	fission
atmo	vapor	atmosphere	gastro	stomach	gastropods
atom (a+tom)	indivisible	atomic	gen	origin	genetics
aud/audi	hear	audiometer	geo	earth	geology
aur	gold	Aurora	germ	related/vital	germinate
auto	self	autotrophic	gest	carry	digestion
baro	pressure	barometer	glyc	sweet	glycerin
bath	deep	bathyscaph	gram/graph	write	seismograph
bio	life	biological	grav	heavy	gravity
blasto	embryo	blastocyst	gyn	female	gynecology
brachio	arm	brachium	gymno	naked	gymnosperm
branchio	gills	branchia	gyro	turn	gyroscope
bronch	windpipe	bronchial	helio	sun	heliotropic
calor	heat	caloric	hema/hemo	blood	hemoglobin
cardi/cardio	heart	cardiogram	hepat	liver	hepatitis
carn	meat/flesh	carnivore	hetero	different	heteromorphic
cephalo	head	cephalopod	hibern	winter	hibernation
chlor	green	chlorophyll	hist	tissue	histology
chrom	color	chromosome	homo	same	homozygous
chron	time	chronometer	hydro/hydra	water	hydrometer
coel	hollow	coelenterates	hyper	over	hyperacidity
corp	body	corpuscle	ichthy	fish	ichthyologist
cosmo	universe/world	microcosm	ign	fire	igneous
cranio	skull	intracranial	infra	beneath	infrared
cyan	blue	cyanide	intra	within	intracellular
cyclo	circle	cyclotron	ite	mineral	granite
cyt	cell	cyclotron	itis	inflammation	appendicitis
dendr	tree	dendrite	ium	element	radium
derm	skin	dermatology	kine	motion	kinetic
diplo	double	diplococcus	lepsy	attack	epilepsy
dorm	sleep	dormancy	leuko/leuc	white	leukemia
dors	back	dorsal	lign	mineral/fossil	halite
dyna	power	dynamite	lith	rock	lithium
dys	bad	dysentery	luc/lum	light	lumen
echin	spiny	echinodermata	luna	moon	lunar
eco	house	ecology	lys	breakdown	dialysis
ecto	outer	ectoplasm	macro	large	macrobiotics
endo	within	endoplasm	mal	bad	malignant

morpheme	meaning	sample word	morpheme	meaning	sample word
mar	sea	marine	pter	wing	pterodactyl
melano	black	melanoma	pyro	fire	pyrotechnic
meta	change	metamorphosis	radi	ray	radiation
meter	measure	millimeter	rhiz	root	rhizome
micro	small	microscope	rhodo	rose	rhododendron
moll	soft	mollusk	saur	lizard	dinosaur
morph	shape	metamorphosis	scope	see	microscope
mut	change	mutation	sect	cut	dissection
myo	muscle	myocardium	sphere	ball	hydrosphere
neo	new	neonatal	sol	sun	solar
neuro	nerve	neurology	solv	loosen	solvent
nuc	center	nucleus	som	body	somatic
ocul	eye	ocular	sperm	seed	spermatophyte
oid	appearance	asteroid	spir(e)	breathe	respiration
ology	study of	dermatology	spor(e)	seed	sporophyte
oma	tumor	carcinoma	stell	star	interstellar
omni	all	omnivore	stereo	solid	stereoscope
ophthal	eye	ophthalmology	strat	layer	stratosphere
ornith	bird	ornithology	sub	below	substratum
oscu	mouth	osculum	sym/syn	with/together	symbiosis
ose	sugar	glucose	taxis	arrangement	taxonomy
osis	condition	osmosis	tele	far	telescope
osteo	bone	osteopath	therm	heat	thermometer
ov/ovi	egg	oviduct	tomy	cut	anatomy
patho	disease	pathogen	tox	poison	toxins
ped/pod	foot	bipeds	trich	hair	trichinosis
petr	rock	petroglyph	trop	turn	troposphere
phag	eat	phagocyte	troph	nourishment	autotrophic
phasia	speech	aphasia	ultra	beyond	ultraviolet
phen	appearance	phenotype	vac	empty	vacuole
phono	sound	phonon	vas	vessel	vascular
phor	carry	chromatophore	vect	carry	convection
photo	light	photosynthesis	ventri	belly	ventral
phyll	leaf	chlorophyll	vermin	worm	vermin
phylo	kind	phylum	vert	turn	vertebra
physi	nature	physics	viv/vita	life	vitamin
phyte	plant	saprophyte	volcan/	fire	volcano
plasm	form	cytoplasm	vulcan		
plasto	molded	plastid	volv	roll	revolution
platy	flat	platypus	vore	eat	herbivore
pneumo	lung	pneumonia	xylo	wood	xylem
prim	first	primate	zo(o)	animal	zoology
proto	first	protoplasm	zygo	yoke	zygote
pseudo	false	pseudopod	zym	ferment	enzyme

Math Morphemes (Ron Yoshimoto compilation)

morpheme	meaning	sample word	morpheme	meaning	sample word
alt	high	altitude	nom	name	denominator
